3. What is the main difference between the **Accounting** and the **Currency** number format in Excel? If you are not sure, head on over to Excel and have a play with some numbers before you attempt to answer this question.

1 / 1 point

- ☒ The main difference is that in the **Accounting** format, the currency symbol is left aligned, away from the number.
- ☐ In the **Currency** format, negative values are automatically displayed in red
- ☐ In the **Accounting** format, decimal points are aligned in a column.

✓ Correct

Spot on. That's the main difference between these formats. There are other differences, but this is the main one.
