

1. You can insert a column on the left of an existing column by ... (One or more answers are possible — partial credit will be awarded)

1 / 1 point

- ☐ Selecting a column and pressing the **Insert** key on your keyboard.
- ☒ On the **Home** tab, selecting **Insert**, then **Insert Sheet Columns**

✓ **Correct**

Yes, spot on. The Insert button on the HOME tab allows you to insert columns.

- ☒ Right-clicking on the column header and selecting **Insert**.

✓ **Correct**

Yes, you got that right. This is one quick way of inserting a column.

2. Sean wants to delete the contents of cells **O3**, **O4**, **P3** and **P4**. He right-clicks and select **Delete...** from the context menu. Can you explain what's happening? Is he on the right track? (One or more answers are possible — partial credit will be awarded)

- ☒ Sean got mixed up with the ways to delete content of cells versus deleting rows and columns. The correct way to do it would have been to select the cells and then navigate to the **Home** tab, press **Clear**, then select **Clear Contents**.

✓ **Correct**

Yes, this is certainly correct. It's a slightly slower way of doing it, but it works!

- ☒ Sean got mixed up with the ways to delete content of cells versus deleting rows and columns. If he hits OK, he will create a mess on his worksheet.

✓ **Correct**

Yes, you have understood this part really well. Not all 'Delete' tools in Excel have the same functionality.

- ☐ What he has done is fine. He just needs to click OK now and then the content of his cells will disappear. The rest of his data will stay intact.

3. Sean needs to add a new account manager to his table but he wants to keep the same sorting and formatting. How will he add Robert Demarko to his spreadsheet without losing the current alphabetical listing? (One or more answers are possible — partial credit will be awarded)

- ☒ Right-click on the **Row 10** symbol and select **Insert**.

☒ **Correct**

Great stuff. This is a great way to insert a new row between the entries for Chairs and Fernandes.

- ☒ Single-click in row 10 of the table and use the keyboard shortcut **CTRL + SHIFT + =**.

☒ **Correct**

Super - you have already learned the keyboard shortcut for inserting rows and columns. Nice work!

- ☐ Single-click into **A10** and add a new cell.

- ☐ Right-click on the **Row 9** symbol and select **Insert**.

- ☒ Single-click anywhere in row 10 and navigate to the **Insert** tool on the **Home** tab, select **Insert Sheet Rows**.

☒ **Correct**

Well done, this will definitely insert a new row in the right spot.
