1. What formula would return the first 5 letters of the text in cell **A1**?   1 / 1 point

- ⚪ =LEFT(A1,1-5)
- 🔘 =LEFT(A1,5)
- ⚪ =LEFT(A1,1,5)
- ⚪ =LEFT(5,A1)

> ✅ **Correct**
> Great work! You understand how the LEFT function works, as well as its syntax.

2.   1 / 1 point

An ISBN is a number that identifies a particular edition of a book. There are 2 lengths of ISBN: ISBN-13 which is 13 characters long and ISBN-10 which is 10 characters long. You can convert from an ISBN-13 to ISBN-10 by removing the first 3 numbers. In cell **A2** you have the ISBN-13 9780747532699. How would you convert this to an ISBN-10 (0747532699)?

- 🔘 =RIGHT(A2,10)

- ⚪ =MID(A2,3,10)

- ⚪ =LEFT(A2,3)

> ✅ **Correct**
> Indeed, this will extract the ten right-most characters.

3.   1 / 1 point

Cell **A2** contains the US telephone number **(939) 555-0113**. What will be displayed using the formula **=MID(A2,7,3)**?

```
555
```

> ✅ **Correct**
> Great work here!
