1. The correct way to get an average of the values in cells **A3** to **A9** would be   1/1 point

   ○ =AVERAGE(A3):(A9)

   ○ =AVERAGE(A3:A9)/6

   ◉ =AVERAGE(A3:A9)

   ○ =(AVERAGE A3:A9)

   > ⊘ **Correct**
   > Yes, you are spot on. Well done. You are ready for the next challenge.

2. Using the screenshot below, which function would give us the value 4?   1/1 point

   If you are not sure, why don't you quickly type of the four numbers below in Excel and try out the different functions? Remember, practice makes permanent.

	A
1	Test Results
2	9
3	4
4	8
5	6

   ○ =SUM(A2:A5)

   ○ =MAX(A2:A5)

   ◉ =MIN(A2:A5)

   ○ =AVERAGE(A2:A5)

   > ⊘ **Correct**
   > Yes, that's exactly right. This function returns the lowest value out of a specific range. In this case the result is 4 - just what we were looking for.

3. Using the screenshot below, which function would give us the answer 9?   1/1 point

   If you are not sure, why don't you quickly type of the four numbers below in Excel and try out the different functions? Remember, practice makes permanent.

	A
1	Test Results
2	9
3	4
4	8
5	6

   ○ =AVERAGE(A2:A5)

   ◉ =MAX(A2:A5)

   ○ =SUM(A2:A5)

   ○ =MIN(A2:A5)

   > ⊘ **Correct**
   > Yes, that's exactly right. This function returns the highest value out of a specific range. In this case the result is 9 - just what we were looking for.
