

1. Which option below describes correct cell referencing to apply conditional formatting to the *whole row* of a data set rather than a single cell?

1 / 1 point

- ☐ Absolute cell references for both rows and columns.
- ☐ Relative cell references for both rows and columns.
- ☐ Absolute references for rows and relative references for columns.
- ☒ Relative references for rows and absolute references for columns.

✓ **Correct**

Yes, that's correct. This is a great way to highlight a complete row for maximum visibility.

2. Which option below is correct about using a formula in conditional formatting?

1 / 1 point

- ☒ Go to the **Home** tab, click on the **Conditional Formatting** button, then select **New Rule, Use a Formula**.
- ☐ Right click on the selected cell/s, choose **Format Cells, Conditional Formatting**, then **Formulas**.
- ☐ Go to **Formulas** tab, click on the **Conditional Formatting** button, then select **New Rule, Use a Formula**.

✓ **Correct**

Yes, that's right. Access **Conditional Formatting** from the **Home** tab, click **New Rule** and then select **Use a Formula**.
