

1. Where is the Data Tables tool located?

1 / 1 point

- ☒ Go to the **Data** tab, locate the **Forecast** group and go to the **What-If Analysis**.
- ☐ You can access Data Tables through the right-click context menu.
- ☐ Go to the **Home** tab, locate the **Data Tools** group and go to the **What-If Analysis**.

✓ **Correct**

Yes, that's right. **Data Tables** are located in the drop down for the the **What If Analysis**.

2. When you create a Data Table, you need to specify your input row or column. What is that?

1 / 1 point

- ☒ The input for the Data Table is the variable that will change and for which you are building this Table.
- ☐ The input for the Data Table is the variable that stays the same and is your base scenario.
- ☐ The input for the Data Table is the variable that Excel needs to look up from your array.

✓ **Correct**

Yes, that's correct. In our example this week, the input variables were listed in a column, so we had to select column input.

3. The function of the **Data Table** tool can be summarized as follows:

1 / 1 point

Data Tables are a quick way of displaying how the outcomes of a calculation change by varying the inputs.

- ☒ True
- ☐ False

✓ **Correct**

Yes, that's correct. Data tables are very handy and can quickly display calculations with multiple results.

4. For the Data Table in **A15:B22**, a **Data Table** is useful because

1 / 1 point

SUM		X ✓ f _x		=E16*G12			
	A	B	C	D	E	F	G
11							
12	TOTAL HOURS						200.0
13							
14							
15	Estimated Wage Cost	=E16*G12					
16	\$11	\$2,200.00					
17	\$12	\$2,400.00					
18	\$13	\$2,600.00					
19	\$14	\$2,800.00					
20	\$15	\$3,000.00					
21	\$16	\$3,200.00					
22	\$17	\$3,400.00					
23							

Expenses		
Hourly Wage		\$15
Estimated Wage Cost		\$3,300.00
Bonus		10%

- ☐ It calculates the estimated wage cost for a variety of values for hours worked.
- ☒ It calculates the estimated wage cost for a variety of values for the hourly wage.
- ☐ It calculates the estimated wage cost for a variety of values for the hourly wage, and a variety of values for hours worked.

✓ **Correct**

Yes! This will save a lot of time!

5. For the Data Table in **A15:B22**, when selecting the **Data Table** option, what is cell **E16** referred to?

1 point

SUM								
	A	B	C	D	E	F	G	H
11								
12	TOTAL HOURS						200.0	
13								
14								
15	Estimated Wage Cost	=E16*G12						
16	\$11	\$2,200.00						
17	\$12	\$2,400.00						
18	\$13	\$2,600.00						
19	\$14	\$2,800.00						
20	\$15	\$3,000.00						
21	\$16	\$3,200.00						
22	\$17	\$3,400.00						
23								

- ☐ The column input cell.
- ☒ The row input cell.

✗ **Incorrect**

Sorry, this is not correct. Why not watch this segment of the video again?

6. To create the Data Table displayed above, after typing the formula in **A26**, you need to select:

1 / 1 point

SUM								
	A	B	C	D	E	F	G	
11								
12	TOTAL HOURS						200.0	
13								
14								
15								
16								
17								
18								
19								
20								
21								
22								
23								
24								
25	Estimated Wage + Bonus							
26	=E16*G12*(1+E18)	1.00%	1.10%	1.20%	1.30%	1.40%	1.50%	
27	\$11	\$2,222.00	\$2,224.20	\$2,226.40	\$2,228.60	\$2,230.80	\$2,233.00	
28	\$12	\$2,424.00	\$2,426.40	\$2,428.80	\$2,431.20	\$2,433.60	\$2,436.00	
29	\$13	\$2,626.00	\$2,628.60	\$2,631.20	\$2,633.80	\$2,636.40	\$2,639.00	
30	\$14	\$2,828.00	\$2,830.80	\$2,833.60	\$2,836.40	\$2,839.20	\$2,842.00	
31	\$15	\$3,030.00	\$3,033.00	\$3,036.00	\$3,039.00	\$3,042.00	\$3,045.00	
32	\$16	\$3,232.00	\$3,235.20	\$3,238.40	\$3,241.60	\$3,244.80	\$3,248.00	
33	\$17	\$3,434.00	\$3,437.40	\$3,440.80	\$3,444.20	\$3,447.60	\$3,451.00	
34	\$18	\$3,636.00	\$3,639.60	\$3,643.20	\$3,646.80	\$3,650.40	\$3,654.00	
35								

- ☐ B26:G34
- ☒ A26:G34
- ☐ A27:G34

✓ **Correct**

Great work! You understand how Data Tables that have both a row input and a column input work.

7. For the Data Table in **A26:G34**, after clicking on Data Table, what do cells **E16** and **E18** represent?

1 / 1 point

SUM	*		X	✓	f _x	=E16*G12*(1+E18)	
11	A	B	C	D	E	F	G
12	TOTAL HOURS						200.0
13							
14							
15				Expenses			
16				Hourly Wage	\$30		
17				Estimated Wage Cost	\$6,600.00		
18				Bonus	10%		
19							
20							
21							
22							
23							
24							
25	Estimated Wage + Bonus						
26	=E16*G12*(1+E18)	1.00%	1.10%	1.20%	1.30%	1.40%	1.50%
27	\$11	\$2,222.00	\$2,224.20	\$2,226.40	\$2,228.60	\$2,230.80	\$2,233.00
28	\$12	\$2,424.00	\$2,426.40	\$2,428.80	\$2,431.20	\$2,433.60	\$2,436.00
29	\$13	\$2,626.00	\$2,628.60	\$2,631.20	\$2,633.80	\$2,636.40	\$2,639.00
30	\$14	\$2,828.00	\$2,830.80	\$2,833.60	\$2,836.40	\$2,839.20	\$2,842.00
31	\$15	\$3,030.00	\$3,033.00	\$3,036.00	\$3,039.00	\$3,042.00	\$3,045.00
32	\$16	\$3,232.00	\$3,235.20	\$3,238.40	\$3,241.60	\$3,244.80	\$3,248.00
33	\$17	\$3,434.00	\$3,437.40	\$3,440.80	\$3,444.20	\$3,447.60	\$3,451.00
34	\$18	\$3,636.00	\$3,639.60	\$3,643.20	\$3,646.80	\$3,650.40	\$3,654.00
35							

- ☒ E16 is the Column input cell; E18 is the Row input cell.
- ☐ E16 is the Row input cell; E18 is the Column input cell.
- ☐ E16 is the Row input cell; E18 is the Row input cell

☒ **Correct**

Great work! You understand how Data Tables that have both a row input and a column input work.
