

1.

Can you predict what will happen when I press **OK**?

1 / 1 point

- ☒ Nothing goes wrong at this stage, you can press **OK**, and it will proceed as normal.
- ☐ Yes, Excel will pop up an error message because I have forgotten to include an equal sign.
- ☐ No, it is unpredictable what will happen because the correct thing would have been to include an equal sign. It is bad practice to do this but the **Scenario Manager** can still function normally when it's done.
- ☒ **Correct**

Yes, this is in fact correct, it is only when we try to show the scenario, that the above formula will be treated as text and may return a #VALUE error.

2.

Refer to the worksheet below. This is the **Scenario Summary** for data on a different worksheet. What scenarios have been added to the **Scenario Manager**?

1 / 1 point

(One or more correct answer possible. Partial credit will be awarded.)

☒ Less Gardens.

☒ **Correct**

Yes! The title in the heading gives this away!

☒ More Gardens.

☒ **Correct**

Yes! The title in the heading gives this away!

☐ Current Values

3. Refer to the worksheet below. This is the **Scenario Summary** for data on a different worksheet. For the **Scenario Manager** to be meaningful, which of the following must be true?

1 / 1 point

The screenshot shows an Excel worksheet with a table titled "Scenario Summary". The table has columns for "Current Values", "Less Gardens", and "More Gardens". The "Changing Cells" row shows values of \$B\$38, 1.00, 3.00, and 4.00. The "Result Cells" row shows values of \$B\$40, \$128,000.00, \$144,000.00, and \$152,000.00. A note below the table states: "Notes: Current Values column represents values of changing cells at time Scenario Summary Report was created. Changing cells for each scenario are highlighted in gray." To the right of the worksheet is the "Scenario Manager" dialog box, which is empty except for the "Changing cells" and "Comment" fields.

Scenario Summary			
	Current Values	Less Gardens	More Gardens
Changing Cells:			
\$B\$38	1.00	3.00	4.00
Result Cells:			
\$B\$40	\$128,000.00	\$144,000.00	\$152,000.00

Notes: Current Values column represents values of changing cells at time Scenario Summary Report was created. Changing cells for each scenario are highlighted in gray.

Comment:

Show Close

☐ Cells **B38:B40** must have calculations.

☐ Cell **B38** must have a calculation.

☒ Cell **B40** must have a calculation.

☒ **Correct**

Indeed. For the **Scenario Manager** to be meaningful, we are trying to see what a particular result is depending on various scenarios for our inputs.
