

Quiz 3: Sorting and Filtering

Date: 31st Dec, 2025.

1. To form a grouping like a grouping by quarter and year I have to:

1 / 1 point

(Multiple answers are possible. Partial credit will be awarded)

- ☐ You can be clicked anywhere in the pivot table and go to **Analyze** tab and go to **Group** field in the **Group** tools.
- ☒ Click on one of the cells included in that field and go to **Group** selection in the **Analyze** tab (in the **Group** tools).

✓ Correct

- ☒ Click on one of the cells included in that field and right-click and go to **Group**.

✓ Correct

2. Using the attached Workbook:

1 / 1 point

W6_GroupSortFilter
XLSX File

Create a **Pivot Table** that shows the sum of total by months. (Hint : Drag **Order Year** out of row labels, drag **Order Date** into the **Column Labels**, the rest should be obvious now.)

What is the sum of total for 2013, February, NSW?

- ☐ 0
- ☐ 1212.58
- ☐ 10370.17
- ☒ 9157.58

✓ Correct

Great work in creating that Pivot Table!

3. Sean has applied a filter to the row and column, he now wants to remove the column filter. Uma suggests that he can go to the **Data** tab in the ribbon and press **Clear** in the **Sort & Filter** tools. Is Uma right?

1 / 1 point

- ☐ Yes
- ☒ No

✓ Correct

This will clear both the row and column filters.
