

Quiz 3: Edit a Macro

January 15th, 2026.

1. Which of the following options are components of the VBA Editor?

0.8 / 1 point

☐ The Developer tab

☒ Code Window

✓ **Correct**

Yes, that's correct. The Code Window displays all the lines of code stored in a macro.

☒ Project Explorer

✓ **Correct**

Yes, the Project Explorer displays the the available VBA Projects.

☒ Macro Editor

✗ **This should not be selected**

No, this answer is not correct. This is not a part of the VBA Editor.

2. What is this line in the Code Window referred to and what is it's purpose?

1 / 1 point

```
' Create_Timesheet Macro
```

☒ This is a comment - they can appear anywhere in the code and are always ignored by the compiler.

☐ This is a line of code - it's an important part of the subroutine and controls one of the macro's action.

☐ This is the heading row - all macros begin with this line of code.

✓ **Correct**

Yes, that's correct. Comments are very useful for a number of reasons and are always ignored by the compiler.

3. What is the purpose of this line of code?

1 / 1 point

```
Sub Create_Timesheet()
```

☐ This is a line of code - it's an important part of the subroutine and controls one of the macro's action.

☒ This is the heading row - it stands for subroutine and all macros begin with this line of code.

☐ This is a comment - they can appear anywhere in the code and are always ignored by the compiler.

✓ **Correct**

Yes, that's correct. Sub stands for subroutine and is followed by the macro's title. Remember that all macros finish with the line **End Sub**.

4. Each instruction to the compiler should appear on a new line in the Code Window.

- ☒ True
- ☐ False

✓ **Correct**

Yes, that's correct. If you want to enter a new instruction, start a new line.
