

1. Any references used in macros are treated as relative references by default.

1 / 1 point

- ☐ True
- ☒ False

✓ **Correct**

You are right. This statement is not true. When you record a macro and you want to use relative references, you need to press the button **Use Relative References**.

2. Which of the options below explain why you would choose to use relative references in a macro?

1 / 1 point

- ☐ You want the cell values copied to the macro to remain the same.
- ☐ You want to ensure that the macro always refers to the specific cell(s) you chose.
- ☒ You want to make sure that the macro chooses cells relative to a position you chose when you recorded the macro.

✓ **Correct**

Yes, that's correct. This is why you would use relative references when recording a macro.
