

1. To locate all the cells that are used in a formula in a cell, I can

1 / 1 point

- ☐ Click on **Trace Dependents**.
- ☐ Click on **Find & Select > Go To Special > Formulas**.
- ☒ Click on **Trace Precedents**.
- ☐ Click on **Evaluate Formulas**.

✓ **Correct**

Yes, that's right. Precedents are the cell(s) that are referred to in a formula.

2. It is possible to select a range of cells and find all their precedents in one step by clicking on **Trace Precedents**.

1 / 1 point

- ☐ True
- ☒ False

✓ **Correct**

You are right. This statement is not true. Clicking on **Trace Precedents** will only show you the first level of cells that provide data to the active cell. If you want to see more, you will need to click on the button again.

3. It is possible to show the Precedents of the Precedents of a cell by clicking the Trace Precedents button as often as needed.

1 / 1 point

- ☒ True
- ☐ False

✓ **Correct**

Yes, that is a true statements. You can use the button as many times as it takes to display of levels of cells that refer to your active cell.

4. Which of the options below will remove the arrows created by the Trace Precedents/Dependents tool?

1 / 1 point

- ☒ Click on **Remove Arrows** on the **Formulas** tab.
- ☐ Press the **Delete** button.
- ☐ Click on **Clear Formats** on the **Home** tab.
- ☐ Press the **Esc** button.

✓ **Correct**

Yes, that's correct. You need to use this specific button in order to remove the tracer arrows.

5. Take a look at the screenshot below. What does the dashed black arrow indicate?

1 / 1 point

2013	2014
\$7,613.94	\$6,856.23
\$5,695.66	\$130.74
\$5,150.16	\$6,707.86
\$14,278.14	\$15,766.07
\$16,049.81	\$61,179.23
\$21,750.56	\$42,012.13

- ☐ This refers to a value in a different table.
- ☒ This refers to a value in a different worksheet.
- ☐ This refers to a value that is further removed from the original calculation.

✓ **Correct**

Yes, that's correct. Whenever you see the kind of tracer arrow, you know that this refers to a different worksheet or even workbook (although the other workbook needs to be open before Excel can trace the relationship).
