

Quiz 4: Evaluate Formula, Watch Window

January 14th, 2026.

1. In the **Evaluate Formula** dialogue box, what happens when you press **Step In**?

1 / 1 point

- ☐ The value of the highlighted expression is displayed.
- ☐ The cursor moves to the next part of the formula.
- ☐ The shows the formula for the next cell below.
- ☒ The formula of the highlighted component is displayed in a new line.

✔ **Correct**

Yes, that's correct. The Step In feature displays a formula that is referred to in your active formula in a separate box.

2. In order to evaluate each part of a formula individually, I can use

1 / 1 point

- ☐ Go to Special, then Formulas and select Errors
- ☒ Evaluate Formula
- ☐ Show Formulas
- ☐ Trace Errors

✔ **Correct**

Yes, this is correct. The **Evaluate Formula** tool evaluates the formula in the active cell, step-by-step.

3. Which option allows the user to check the changes applied to a cell(s) containing formula in other worksheets without directly checking the worksheet?

1 / 1 point

- ☐ Trace Precedents
- ☐ Evaluate Formula
- ☐ Trace Dependents
- ☒ Watch Window

✔ **Correct**

Yes, that's right. The Watch Window will allow you to watch the use of a formula and its result even when the cells are not visible on your active worksheet. Very handy!
